

Compact Ventilation Fan with Square Grille

This compact ventilation fan is designed for removing stale air and odors from enclosed spaces. It features a square grille front with horizontal slats and a centrally located fan, providing optimal airflow while preventing the entry of debris.

Product Overview

Compact Ventilation Solutions

The HX-801 is a compact and efficient ventilating fan engineered to maintain air quality by removing stale air and odors from enclosed spaces. Featuring a robust square grille with horizontal slats, the design optimizes airflow while effectively preventing the entry of debris. Its durable construction and versatile build make it an ideal choice for residential or commercial applications, including bathrooms and kitchens.
