Overview

Compact Wheat Flour Milling Solution

This complete wheat processing line features a compact, two-layer steel structure designed to minimize construction and operational costs. It integrates the entire milling workflow, from initial cleaning and conditioning to grinding, sifting, and automatic packing. Engineered for efficiency, this system is an ideal investment for new businesses seeking fast repayment and high-quality flour production.

Processing Workflow

Process Stages

- 1st Cleaning
- Conditioning
- 2nd Cleaning
- Grinding
- Sifting
- Automatic Packing

Cleaning Technology Components

Component	Quantity
Separators	3
Wheat Scourers	2
Destoners	2
Conditioning Units	1
Magnetic Separators	3

Product Capabilities

Certifications
SGS • ISO 9001

Suitable Flour Types

Bread Flour, Biscuit Flour, Cake Flour, Pasta Flour

Design & Construction

Structure Design

Two-layer steel structure
