Overview

Compact Wheel Loader Performance

This compact wheel loader is a versatile machine engineered for efficient operation in both construction and agricultural environments. Designed for maneuverability in tight spaces, it features a robust hydraulic system and a powerful engine to handle material loading tasks with ease. With its durable construction and operator-focused cabin, this loader provides a reliable solution for various small to medium-sized earthmoving projects.

Performance Metrics

Rated Lifting Capacity

2000 kg
Lifting Capacity

Bucket Capacity	1.2 m ³
Engine Power	55 kW

Features & Safety

Key Features

- Quick-hitch attachment system
- Compact design for tight spaces
- Robust hydraulic system
- Durable all-terrain tires

Suitable Applications

Urban Construction • Small Farms • Material Handling • Earthmoving

Safety Standards	ROPS, FOPS
