

Compact Wine and Beverage Cooler

This compact refrigerator is designed for efficient cooling and storage of wine and beverages. It features adjustable shelves, a temperature control system and space-saving design.

Product Overview

Compact Storage Solution

The Wine and Beverage Cooler BG-90 is a compact, high-efficiency refrigeration unit engineered for optimal storage in space-constrained environments. It features a precise temperature control system and fully adjustable shelving to accommodate various beverage sizes. Designed for long-term reliability and low power consumption, this cooler provides professional-grade performance for commercial and residential beverage storage.
