Product Overview

High-Efficiency Flour Milling Solutions

This complete flour milling line is engineered for high-throughput commercial grain processing, offering a comprehensive turnkey solution from cleaning and grinding to sifting and final packaging. Designed for reliability and consistent output, the system features advanced pneumatic conveying and automated control systems to ensure optimal flour quality. With flexible configurations and customizable setups, this line is suitable for various grains, including wheat, corn, and rice.

Technical Specifications

Processing Capacity

200 tons

Maximum Daily Capacity

10 tons

Minimum Daily Capacity

Milling Process Stages

- Cleaning
- Grinding
- Sifting
- Purification
- Packaging

Equipment Features

Key Components

Roller Mills, Sifters, Purifiers, Pneumatic Conveyors, Intake Hoppers, Grain Elevators

Service & Warranty

Warranty Coverage

- One year quality guarantee
- One year free spare parts

Included Services

Turnkey Design, Installation Support, Commissioning, Worker Training, Lifelong Service
