Overview

High-Efficiency Mineral Water Bottling Line

This complete bottling solution is designed for automated, high-speed mineral water packaging. Featuring advanced Siemens PLC control and micro-pressure filling technology, it ensures stable and reliable operation. The system is highly adaptable, allowing for quick adjustments to accommodate various bottle types, making it an ideal choice for medium to large-scale production facilities.

Technical Specifications

Control System	Siemens PLC (Programmable Logic Controller)
Filling Method	Micro-pressure filling
Automation Features	Automatic Operation, Photoelectric Inspection, Transducer Speed Control

Performance

Production Capacity

500 bottles/h

Capacity

Machine Dimensions (L*W*H)

Model Variant	Dimensions (mm)
Variant 1	2500*1880*2300
Variant 2	2600*1900*2300
Variant 3	2800*2150*2300
Variant 4	3100*2450*2300
Variant 5	3880*2800*2500
Variant 6	4100*3000*2500
Variant 7	4500*3300*2350

Operational Features

Operational Flexibility	Yes
Temperature Control Capability	Yes
