

Complete Rice Milling Production Line

This complete rice milling production line is engineered for efficient and high-quality rice processing. It integrates pre-cleaning, destoning, husking, paddy separation, whitening, polishing, grading, and automated packaging.

Overview

Automated Milling Solution

This milling series provides an automated solution designed to significantly reduce manual workload while maintaining continuous operation. The system utilizes pneumatic conveying to minimize dust pollution and improve environmental conditions. By optimizing the milling process, it effectively lowers ground stock temperature, resulting in improved flour quality. It is versatile enough to handle maize, wheat, and cereal grain milling by simply changing the sieve cloths.

Technical Specifications

Model MF-100 Specifications

Metric	Value
Model	MF-100
Output	300-1500 kg/h
Weight	2350 kg
Power	13.5 kW
Dimensions	6300mm x 2800mm x 4410mm
Mesh Size	80-120

Key Features

Operational Benefits

- Fully automated operation
- Pneumatic conveying for dust reduction
- Improved flour quality via temperature control
- Easy to operate and maintain
- Multi-grain compatibility (maize, wheat, cereals)

Suitable Applications

Wheat, Corn, Maize, Soybean, Oats, Barley, Hummus

Service & Support

Warranty & Support

1 Year Warranty • Lifetime Maintenance • Online Video Inspection • Installation Guidance
