

Component RGB Video and Audio Connector Set

This set includes component video and audio input/output ports for connecting various devices. It uses color-coded RCA connectors to transmit high-quality analog video and audio between DVD players, gaming consoles, and televisions.

Product Overview

High-Quality Analog Connectivity

This Component RGB Video and Audio Connector Set provides a reliable solution for transmitting high-quality analog video and stereo audio signals. Featuring standard color-coded RCA ports, it ensures easy identification and secure connections between devices. Designed for compatibility with equipment such as DVD players, gaming consoles, and televisions, this connector set maintains signal integrity for clear audio-visual performance.
