

Component Speaker System with Woofer, Tweeter, and Crossover

This component speaker system features a woofer with a distinctive cone design and a compact tweeter. The crossover network, housed in a clear plastic case, contains electronic components and terminals for connecting to the amplifier and speakers.

Product Overview

High-Performance Component Speaker System

This professional-grade component speaker system is engineered to provide precise audio reproduction for automotive and custom sound applications. The set features a specialized woofer with a distinct cone design, a dedicated high-frequency tweeter, and a robust crossover network. Designed for frequency separation and optimal sound clarity, this system ensures a balanced audio experience across the spectrum.

Technical Specifications

Included Components

- Woofer with checkered cone design
- Compact tweeter with protective grille
- Crossover network in clear protective housing

Primary Applications

Automotive Audio • Custom Sound Installations

Design Features

Gold-colored center element, Clear crossover casing, Enhanced protective grille
