

Component Stick Feeder for Electronic Assembly

This stick feeder is compatible with YV, YG, and YS series machines. It supports both 24V and 220V power supplies for flexible integration.

Product Overview

Industrial Component Stick Feeder

This high-precision stick feeder is engineered for efficient component delivery in electronic assembly environments. Constructed from imported aluminum, the unit features an adjustable vibration rate to ensure stable and reliable operation. It is designed to accommodate various IC packaging types, including 3-tube and 5-tube configurations, making it a versatile solution for modern SMT placement lines.

Technical Specifications

Supported IC Formats

- 3-Tube ICs
- 5-Tube ICs

Power Supply Options	24V, 110V, 220V
Material	Imported Aluminum

Compatibility

Compatible Systems

Fuji • Yamaha • Samsung • Sanyo • Sony • Panasert • Universal • Mirae • KME • Siemens • Juki
