

# Compound Leverage Bolt Cutter

This bolt cutter features a compound leverage design, requiring minimal effort for maximum cutting power. It is equipped with durable CR-MO blades, making it suitable for cutting bolts, rods, and other tough materials.

## ADDITIONAL IMAGES

## Product Overview

### Professional Compound Leverage Bolt Cutter

This heavy-duty bolt cutter is engineered with a compound leverage design, significantly reducing the force required for cutting tasks. Featuring hardened CR-MO blades and a robust carbon steel handle, it delivers exceptional cutting performance and durability. It is an ideal tool for industrial, construction, and maintenance applications requiring reliable cutting of bolts, rods, and chains.

## Technical Specifications

### Available Sizes

- 12"
- 14"
- 18"
- 24"
- 30"
- 36"

Blade Material	CR-MO (Chromium-Molybdenum)
Handle Material	Carbon Steel

## Key Features

### Key Advantages

Compound Leverage • Minimum Effort Design • Heavy-Duty Construction • High Durability

## Applications

Cutting Capabilities	Bolts, Rods, Chains
