

Compound Miter Saw with Dust Collection

This power tool is used for making accurate crosscuts and miters in wood and other materials. It features a circular saw blade on a pivoting arm and includes a dust collection bag.

Product Overview

Professional Compound Miter Saw

This compound miter saw is engineered for precision and durability in demanding workshop or job site environments. Featuring a versatile pivoting arm, it allows for both miter and bevel cuts to ensure accurate crosscuts across various materials. The integrated dust collection system helps maintain a clean working area by minimizing sawdust dispersion during operation.

Technical Specifications

Key Features

- Integrated dust collection bag
- Material guide fence
- Precision protractor scale
- Pivoting arm design
