

Compression Driver with Threaded Throat

This high-frequency compression driver is designed for professional audio applications. It features a threaded throat for horn attachment, robust construction, and high power handling.

Product Overview

Professional High-Frequency Compression Driver

This high-frequency compression driver is engineered for demanding professional audio environments. Featuring a durable threaded throat design, it offers reliable attachment to compatible horns and delivers consistent sound performance. Ideal for sound reinforcement systems, stage monitors, and premium loudspeaker enclosures, it ensures robust power handling for high-output applications.

Technical Specifications

Mounting Interface	Threaded Throat
Terminal Type	Screw Terminals

Application & Use

Operating Environment	Indoor • Outdoor
Primary Applications	PA System, Stage Monitors, Sound Reinforcement, Loudspeaker Enclosures
