

Computer CPU Radiator with Cooling Fan

This high-performance radiator is designed for efficient heat dissipation in computer systems. It features a robust heat sink with a green cooling fan for optimal thermal management and compatibility with various CPU sockets.

Product Overview

High-Performance Thermal Management

This computer CPU radiator is engineered for efficient heat dissipation, ensuring your system maintains optimal thermal management during operation. Designed with a robust heat sink and a distinctive green cooling fan, it offers both durability and high-quality build standards. The unit is designed for ease of installation and is compatible with a variety of CPU sockets, making it a reliable choice for professional system builds.

Key Features

Design Origin

U.S.A. Designed

Performance

Cooling Capabilities

High-performance, Efficient heat dissipation, Robust heat sink

Compatibility

Installation

- Easy installation design
- Wide CPU socket compatibility
