Product Overview

Advanced Milling Automation

This computerized automatic control mill is engineered for efficient and precise grain processing in the food and beverage industry. It integrates advanced automation to ensure consistent product quality, optimize milling parameters, and reduce the need for manual operator intervention. Built for durability and high-volume output, the system supports real-time monitoring and comprehensive data logging for process analysis.

Technical Capabilities

Output Varieties

- Maize flour
- Wheat flour
- Corn flour
- Wheat semolina
- Maize grits

Supported Grains

Wheat, Maize, Corn

Service & Support

Service Package

- Special design
- Installation
- Commissioning
- Worker training
- Lifelong service

Warranty Period

1 Year

Quality Guarantee

Included Spare Parts

One year free
