

Computerized Wire Cutting and Stripping Machine

This computerized machine is designed for the precision cutting and stripping of wires. It features a user-friendly interface with a numerical keypad and digital display for accurate programming.

Product Overview

Precision Wire Processing Solution

This computerized wire cutting and stripping machine is engineered for high-precision industrial wire preparation. Featuring a digital interface and numerical keypad, it allows for accurate programming and consistent output. The robust design and integrated safety systems ensure reliable operation in diverse manufacturing environments.

Features

Key Operational Features

- Computerized numerical control
- Digital display interface
- Multi-roller feeding system
- Precision wire guiding mechanism
- Integrated emergency stop safety feature

Compliance

Safety Standards

Emergency Stop, Industrial Grade
