

Concave Diamond Saw Blade for Curve Cutting

This concave blade is specially designed for curve cutting. Sintered blades provide an economic choice for cutting porcelain, ceramic tiles, and marble.

Product Overview

Precision Curve Cutting Solution

This concave diamond saw blade is specifically engineered for intricate curve cutting applications. Utilizing a high-performance hot-pressed sintering process, it ensures durability and consistent cutting precision. It serves as an economical and reliable choice for professionals working with porcelain, ceramic tiles, and marble.

Technical Specifications

Blade Type	Concave Diamond Saw Blade
Manufacturing Process	Hot-pressed sintered

Application & Compatibility

Compatible Materials	Porcelain, Ceramic Tiles, Marble
Primary Usage	Curve cutting
Tool Compatibility	Electric tools and accessories

Key Features

Performance Benefits

- High cutting precision
- Durable construction
- Efficient material removal
- Smooth finish
- Economical for professional use
