

Concealed Duct Air Conditioning Unit

This air conditioning unit is designed for concealed installation, integrating seamlessly into various spaces. It provides efficient cooling and air circulation suitable for both residential and commercial applications.

Overview

Concealed Duct Air Conditioning Unit

This concealed duct air conditioning unit is engineered for seamless integration into residential or commercial ceiling spaces. Its low-profile design ensures efficient cooling and air circulation while remaining hidden from view, providing a clean aesthetic for any interior. Built with a robust metallic cooling coil section, this unit delivers reliable performance for professional HVAC installations.
