Product Overview

Concealed Ducted Climate Control

This concealed ducted air conditioner is engineered for seamless integration into both residential and commercial environments. Its slim, low-profile body allows for discreet installation above ceilings, ensuring that aesthetics remain uncompromised while delivering powerful climate control. Designed for high efficiency and quiet operation, it utilizes an advanced centrifugal fan wheel to provide consistent air distribution.

Performance Metrics

Static Pressure

30 Pa

Min Static Pressure

200 Pa

Max Static Pressure

Technical Features

Fan System	Centrifugal fan wheel
Operational Noise	Low noise design

Design & Installation

Installation

Concealed • Ducted • Slim Body

Suitable Environments

- Residential
- Commercial
