

Concrete Crack Chaser Blade

This crack chaser blade features specialized V-shaped segments ideal for creating smooth grooves in concrete. It is used in repairing cracks and joints in construction.

Product Overview

Precision Crack Repair Solution

The Concrete Crack Chaser Blade is a specialized cutting tool engineered for efficiently widening and cleaning cracks in concrete and masonry surfaces. Featuring a robust steel core and diamond-impregnated segments, this blade delivers precise and controlled cutting action while minimizing chipping. Its unique V-shaped segment design ensures optimal dust extraction and cooling, which significantly extends blade life and enhances overall cutting performance for construction professionals.

Technical Specifications

Machine Compatibility

- Angle Grinders
- Crack Chasing Machines

Segment Profile	V-shaped
Primary Applications	Crack Repair, Joint Preparation, Decorative Concrete

Performance Features

Performance Advantages

Optimal Dust Extraction • High-Efficiency Cooling • Extended Blade Life • Minimal Chipping
