

Concrete Cutting Diamond Saw Blades

Diamond saw blades are designed for cutting concrete and reinforced concrete. They are suitable for concrete lintels, slabs, pipes, and various reinforced concrete applications.

Product Overview

High-Performance Concrete Cutting

These diamond saw blades are engineered specifically for demanding concrete cutting applications. Designed to handle a wide range of materials from cured concrete to reinforced slabs, they offer reliable performance for professional construction projects. Their robust construction ensures durability and efficiency when cutting through wire-reinforced or superhard concrete.

Applications

Supported Materials

- Concrete lintel
- Concrete slab
- Concrete pipes
- Wire reinforcing concrete
- Superhard concrete
- Cured concrete

Key Use Cases

Construction, Infrastructure, Reinforced Concrete, Heavy Duty
