

# Concrete Cutting Machine

The concrete cutting machine is designed for cutting through hard materials like concrete and asphalt. It features adjustable cutting depth and a water cooling system for efficient operation.

## ADDITIONAL IMAGES

## Product Overview

### Professional Concrete Cutting Solution

This robust walk-behind concrete saw is engineered for precision cutting on horizontal surfaces such as concrete and asphalt. Equipped with a high-performance gasoline engine and an integrated water cooling system, it ensures reliable operation, dust suppression, and blade longevity. Designed for heavy-duty construction, demolition, and road maintenance, this machine features adjustable cutting depth and a sturdy, maneuverable frame for professional-grade results.

## Technical Specifications

### Engine Power

**6 HP**

Horsepower

### Engine Model

EX17

### Suitable Materials

Concrete, Asphalt, Stone

## Key Features

### Operational Features

- Adjustable cutting depth
- Integrated water tank for dust suppression
- Blade cooling system
- Safety blade guard
- Wheeled chassis for maneuverability

### Safety Features

Blade Guard • Water Cooling • Operator Controls
