Overview

Professional Surface Preparation

This high-performance concrete floor grinder is engineered for efficient grinding and polishing of concrete, stone, and various hard surfaces. It combines a powerful motor with adjustable grinding pressure and variable speed control, ensuring optimal results across different material types. Designed for both commercial and residential applications, the machine prioritizes operator comfort with an ergonomic build and maintains a clean workspace via an integrated dust control system.

Core Features

- Powerful motor for heavy-duty grinding
- Integrated dust collection system
- Ergonomic design for maneuverability
- User-friendly control panel
- Durable construction

Suitable Materials

Concrete, Stone, Hard Surfaces
