

Concrete Floor Saw

This floor saw is a robust machine designed for cutting concrete and asphalt. It delivers consistent performance and features an adjustable cutting depth and water cooling system.

Overview

Professional Concrete Floor Saw

This robust and efficient machine is engineered for precision cutting on concrete, asphalt, and other hard surfaces. It features a durable frame combined with user-friendly operation, including an adjustable cutting depth and an integrated water cooling system to extend blade life and manage dust. Designed for road construction, repair work, and general concrete cutting, it offers consistent performance and operator comfort.

Key Features

Operational Advantages

- Comfortable grip handles for operator control
- Easy crank mechanism for precise depth adjustment
- Hinged, lift-up blade guard for quick blade replacement
- Integrated saw position guide for straight cuts
- Water system for optimum flow and dust suppression
