

Concrete Floor Saw

This concrete saw is designed for cutting concrete, asphalt, and other hard surfaces. It is used in road construction, building maintenance, and demolition projects for creating expansion joints, repairing pavements, and cutting concrete slabs.

Overview

Professional Concrete Floor Saw

This high-performance concrete floor saw is engineered for precision cutting in road construction, building maintenance, and demolition projects. Designed to handle concrete and asphalt with ease, it features a robust gasoline-powered engine and an integrated water tank system for effective dust suppression and blade cooling. Its ergonomic handle and wheeled chassis ensure superior maneuverability and operator control during heavy-duty cutting tasks.

Technical Specifications

Power Source	Gasoline Engine
Primary Applications	Concrete Cutting, Asphalt Cutting, Road Construction, Expansion Joints, Pavement Repair

Key Features

Blade Guard

Safety Guard Included

Design Features

- Integrated water tank for dust suppression
- Ergonomic operator handle
- Wheeled chassis for mobility
- Gasoline-powered engine

Cooling System

Yes
