

Concrete Floor Saw

This floor saw is designed for strength, durability and performance. The reinforced steel box frame reduces vibrations while sawing, enhancing the performance of the blade and extending the life of the saw.

Product Overview

Professional Concrete & Asphalt Cutting Solution

This high-performance floor saw is engineered for strength, durability, and consistent cutting results on both concrete and asphalt surfaces. Featuring a reinforced steel box frame, the design effectively minimizes vibrations to ensure straight, precise cuts while significantly extending the operational life of both the saw and the blade. With ergonomic, adjustable handles and a user-friendly depth control system, this machine is built to enhance operator comfort and efficiency on demanding job sites.

Key Features

Key Features

- Super-rigid box frame to resist warping and vibration
- Japanese shaft bearings for extended service life
- Ergonomically designed, height-adjustable handles
- Easy-crank system for precise cutting depth adjustment
- Hinged, lift-up blade guard for rapid blade replacement
- Integrated water tank for optimal cooling and dust suppression
- Standard throttle control

Technical Specifications

Blade Grade

Standard • Professional

Engine Type

Air-cooled, 4-cycle, single cylinder

Blade Compatibility

Concrete, Asphalt, Brick, General Purpose

Blade Technology

Laser welded
