

# Concrete Grinding Block with Diamond Segments

This concrete grinding block features diamond segments for efficient material removal. Its durable construction and unique segment design ensure aggressive grinding and optimal performance on various concrete surfaces.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Concrete Grinding

This diamond grinding block is engineered for professional concrete floor restoration, offering high efficiency and aggressive material removal. Designed with a robust metal bond matrix, it effectively handles coatings, adhesives, and surface leveling across various concrete hardness levels. Its durable construction ensures a long lifespan and stable performance, making it an essential tool for preparing surfaces from coarsely structured to pre-polishing stages.

## Technical Specifications

### Bond Hardness Options

Hard • Medium • Soft

### Material Composition

- 45# Steel
- Alloy
- Diamond

Segment Size	40*10*14mm
Number of Segments	2-7
Available Grit Levels	#6, #16, #25, #36, #40, #50, #60, #80, #100, #120, #150, #170, #200

## Application & Usage

### Performance Features

- High aggressive material removal
- Stable performance
- Long operational lifespan
- Efficient debris removal

### Compatible Surfaces

Concrete, Marble, Granite, Quartz

## Logistics & Supply

### Lead Time

**3 days**

Min Lead Time

**7 days**

Max Lead Time

### Monthly Supply Ability

30000 pieces
