

# Concrete Grinding Segment

This grinding segment is designed for concrete of varying hardness. Super coarse options are available based on specific performance requirements.

## Product Overview

### High-Performance Grinding Segment

This diamond grinding segment is engineered for professional concrete and stone polishing applications. Featuring a durable metal bond matrix with embedded industrial-grade diamonds, it ensures aggressive material removal and an extended operational lifespan. It is suitable for both wet and dry grinding, delivering consistent performance on concrete, terrazzo, and natural stone surfaces.

## Technical Specifications

Outer Diameter	12 inch
Segment Height	12 mm
Segment Count	4

## Available Configurations

### Grit and Bond Options

Grit Level	Bond Type
Coarse	Soft
Medium	Soft
Fine	Soft
Coarse	Medium Hard
Medium	Medium Hard
Fine	Medium Hard

## Application

### Grinding Method

Wet Grinding • Dry Grinding

Compatible Materials	Concrete, Terrazzo, Natural Stone
