

Concrete Mixer

Concrete mixers are available in various sizes and configurations to suit different applications. These machines feature a hopper for material input, a central mixing drum, and a robust frame for stability.

Product Overview

Professional Concrete Mixing Solutions

This industrial-grade concrete mixer is engineered for high-performance mixing across a wide variety of construction applications. Designed with a robust frame and efficient material intake, this machine ensures consistent output for demanding sites. Its versatile configuration makes it a reliable choice for professional contractors seeking quality and durability in their mixing equipment.

Technical Specifications

Supported Mixer Configurations

- Self-loading rough terrain mixers
- Standard transit mixers
- Volumetric concrete mixers
- JS double horizontal shaft forced mixer
- Planetary Centrifugal Mixer
- Horizontal batch mixers
- Stationary concrete mixers

Primary Mixer Categories

Forced Action, Gravity Type, Vertical Shaft, Non-tilting, Horizontal Shaft
