

Concrete Mixer - 350L Drum Capacity

This concrete mixer features a simple structure and high efficiency. It is suitable for concrete mixing on building sites, roads, bridges, and water projects.

Overview

High-Efficiency JDY350 Concrete Mixer

The JDY350 is a robust and efficient concrete mixer designed for small to medium-scale construction projects, such as building foundations and sidewalks. It features a rotating drum that ensures thorough mixing of cement, aggregates, and water for consistent concrete quality. Mounted on a sturdy chassis with support legs, this machine offers excellent stability and maneuverability on-site.

Performance Highlights

Performance Metrics

0.35 M3

Discharge Capacity

21 M3/H

Productivity

15 Kw

Mixing Power

Technical Specifications

Power Supply	380V / 50Hz
Charge Capacity	0.56 M3
Pump Power	0.55 Kw

Aggregate Requirements

Max Pebble Diameter	80 mm
Max Macadam Diameter	60 mm

Physical Dimensions

Total Weight	3200 Kg
Working Dimensions	1800 x 2200 x 2300 mm

Series Comparison

Series Performance Comparison

Model	Mixing Power (Kw)	Discharge (M3)	Productivity (M3/H)
JDY350	15	0.35	21
JS500	18.5	0.5	25
JS750	30	0.75	35
JS1000	37	1	50

Applications

Suitable For

Building Foundations, Sidewalks, Small-scale Construction, Concrete Structures
