

Concrete Mixer - JSM400 Type

This concrete mixer is a robust and efficient machine designed for mixing concrete on construction sites. It features a durable mixing drum and a material hopper for easy loading.

Overview

JZM400 Concrete Mixer Overview

The JZM400 concrete mixer is a robust and efficient machine engineered for high-performance concrete preparation on construction sites. With a discharge capacity of 400 liters and a productivity rate of 14 cubic meters per hour, it ensures consistent output for demanding projects. Designed for durability and ease of use, this mixer features a sturdy frame, a reliable material hopper system, and integrated electric motors to maintain high operational standards.

Performance Metrics

Productivity

14 m³/h

Max Productivity

400 L

Discharge Capacity

640 L

Feeding Capacity

Technical Specifications

Mixing Drum Details

Parameter	Value
No-load speed	15 r/min
Aggregate max diameter	60 mm
Hopper average speed	0.3 m/s

Motor System

- Mixing Motor: Y132s-4 (5.5 kW)
- Lifting Motor: YEZ32-4 (4.5 kW)
- Water Pump Motor: 40 JDB-12 (0.55 kW)

Physical Dimensions

Physical Dimensions & Weight

Attribute	Measurement
Overall Dimensions (L x W x H)	3800 x 2050 x 2690 mm
Machine Weight	1990 kg
Tire Size	6.50-16
