

Concrete Mixer Truck

This heavy-duty vehicle is designed for transporting and mixing concrete. It features a robust chassis, a powerful engine, and a large-capacity mixing drum.

Overview

Heavy-Duty Concrete Mixer Truck

This 6x4 concrete mixer truck is engineered for high-performance transport and efficient mixing in demanding construction environments. Featuring a robust chassis and a 9 cubic meter effective mixing volume, it is designed to handle heavy-duty tasks with reliability. The vehicle combines a powerful engine with precise hydraulic systems, ensuring consistent concrete quality and smooth discharge operations on-site.

Performance

Effective Mixing Volume	9 m ³
Maximum Speed	78 km/h
Minimum Turning Diameter	13.6 m

Dimensions

Overall Dimensions (L*W*H)	9600 x 2496 x 3900 mm
Wheelbase	4100 + 1450 mm
Min. Ground Clearance	330 mm

Chassis & Suspension

Driving Model

6x4

Approach/Departure Angles

22 °

Approach Angle

27 °

Departure Angle

Plate Springs (Front/Rear)

9 / 12

Weight

Weight Specifications

Metric	Value
Kerb Mass (kg)	12800
Gross Vehicle Weight (kg)	25000
Permitted Front Axle Load (kg)	7000
Permitted Rear Axle Load (kg)	18000
