

Concrete Mixer Truck Oil Cooler

This oil cooler is specifically designed for concrete mixer trucks. It efficiently dissipates heat from the hydraulic oil, maintaining optimal operating temperatures and preventing overheating.

ADDITIONAL IMAGES

Product Overview

Integrated oil cooler and tank assembly designed for heavy-duty concrete mixer truck hydraulic systems.

High-Performance Hydraulic Cooling

This integrated oil cooler and tank system is engineered specifically for concrete mixer trucks to maintain optimal hydraulic fluid temperatures during operation. The unit features a robust cooling fan, precise temperature regulation, and essential monitoring tools to prevent overheating and extend the lifespan of your hydraulic components. Designed for durability in demanding construction environments, it includes comprehensive monitoring features such as a pressure gauge and visual liquid level indicators.

Technical Specifications

Filter Model	JBUQ2-A50*10Y
Filter Element Type	TWUX-50*10Q (filter paper)
Capacity Options	12L, 15L, 18L

Key Components

Included Components

- Oil Cooler
- Oil Tank
- Fan with Motor
- Oil Filter
- Temperature Switch (German-made)
- Pressure Gauge
- Relay
- Visual Liquid Level Lens
- Visual Oil Lens

Mounting Accessories

- Bolts
- Plugs
- Gasket Rings
- Crash Pads
