

Concrete Mixer with Integrated Pump

This concrete mixer features an integrated pumping system for discharging materials. The system connects a pump to convey concrete to different locations.

Product Overview

Integrated Mixing and Pumping Solution

This concrete mixer features an integrated pumping system, allowing for seamless concrete production and delivery. Designed for industrial applications, it connects the discharging system directly to the pump to efficiently convey materials. It is engineered to meet the needs of professional buyers requiring reliable, high-volume concrete mixing and placement.

Product Capabilities

Available Mixer Configurations

- Mobile concrete mixer
- Twin-shaft concrete mixer
- Vertical-shaft concrete mixer

Compatible Equipment

Concrete Batching Plant • Concrete Drum • Concrete Pump

Operational Safety

Safety & Maintenance

Operator Manual Included, Safety Guidelines, Maintenance Protocols, Troubleshooting Support
