

Concrete Nailer

Pneumatic concrete nailer designed for driving nails into concrete and steel. It is suitable for various construction and industrial applications, including fastening wood to concrete and steel stud attachment.

Product Overview

Professional Pneumatic Concrete Nailer

This pneumatic concrete nailer is a high-performance tool designed specifically for driving nails into challenging substrates like concrete and steel. It features an adjustable depth control and a high-capacity magazine to ensure efficiency across various construction and industrial applications. Built for durability, the tool includes a comfortable grip to reduce fatigue during extended use in demanding work environments.

Performance Metrics

Key Performance Metrics

64 mm

Max Nail Length

Technical Capabilities

Suitable Applications

- Fastening wood to concrete
- Steel stud attachment
- General-purpose industrial nailing
- Driving nails into steel

Model Series

ST64

Standard Features

Adjustable Depth Control, High-Capacity Magazine, Ergonomic Grip, Pneumatic Operation

Operational Requirements

Power Source

Pneumatic (Compressed Air)

Build Quality

Heavy-duty construction for demanding environments
