

Concrete Placement Boom Truck

This heavy-duty construction vehicle is equipped with a multi-section boom for precise concrete placement. Mounted on a multi-axle truck chassis, it provides both mobility and stability for efficient concrete delivery in construction projects.

Overview

Heavy-Duty Concrete Placement Solution

This concrete placement boom truck is engineered for high-efficiency concrete delivery in large-scale construction projects. Featuring a robust multi-section boom mounted on a heavy-duty truck chassis, it offers excellent mobility and precise placement capabilities. The vehicle is built for stability and safety, incorporating high-visibility reflective markings to ensure operational security on busy job sites.

Technical Specifications

Chassis Configuration	Multi-axle heavy-duty truck chassis
Boom Structure	Multi-section articulated boom

Safety & Design

Color Scheme	Red Boom • Yellow Chassis • White Cab
Safety Features	High-visibility reflective stripes, Stabilizing support structures

Key Metrics

Primary Application

1 System

Precision Concrete Delivery
