

# Concrete Placement Hose, Super Pressure, Wear Resistant

This concrete placement hose is designed for super pressure applications. Its wear-resistant construction ensures reliable and long-lasting performance in concrete pumping operations.

## Overview

### High-Performance Concrete Transfer Solution

This third-generation concrete placement hose is engineered specifically for demanding construction environments where high pressure and durability are critical. Designed for use with truck-mounted pumps and heavy concrete machinery, it offers exceptional wear resistance to ensure a long service life. This hose provides a reliable and efficient solution for the consistent transfer of concrete across various large-scale infrastructure projects.

## Performance Metrics

### Key Performance Features

**3 III**

Generation

## Technical Specifications

### Primary Application

- Concrete pumping operations
- Truck-mounted pumps
- Concrete machinery integration
- High-pressure material transfer

### Hose Type

Super Pressure and Wearable Type III

## Quality & Compliance

### Certifications

ISO 9001, International Certificated Enterprise

## Construction & Durability

### Durability Features

Super Pressure Resistant • High Wear Resistance • Long-lasting Performance • Expert Rubber Construction
