

Concrete Power Trowel

This concrete power trowel is designed for smoothing and finishing concrete surfaces. It features a rotating set of blades enclosed within a safety cage and a handle for operator control.

Product Overview

Professional Concrete Finishing Solution

This high-performance concrete power trowel is engineered for professional construction sites, providing superior surface finishing for floors, slabs, and pavements. Designed for efficiency and control, it features a robust rotating blade system encased in a protective safety cage for operator security. With an intuitive handle design, it offers excellent maneuverability, allowing operators to achieve smooth, level concrete surfaces with precision and ease.

Operational Details

Key Features

- Rotating blade system for uniform finish
- Integrated safety cage for operator protection
- Ergonomic handle for enhanced maneuverability
- Top-mounted motor housing

Equipment Type

Construction Machinery • Concrete Finishing Tool

Primary Application

Concrete Finishing, Surface Smoothing, Floor Leveling, Pavement Construction
