

Concrete Power Trowel

This power trowel is a construction machine designed for smoothing and finishing concrete surfaces. It features a rotating set of blades enclosed within a safety cage for efficient operation.

Overview

Professional Concrete Finishing

This power trowel is a heavy-duty construction machine engineered for professional concrete smoothing and finishing. Featuring a reliable 6.5hp gasoline engine, it ensures consistent power for achieving high-quality surface results on slabs, floors, and pavements. Its robust design and rotating blade assembly provide the precision and efficiency required for demanding construction projects.

Technical Specifications

Working Speed

60 rpm

Minimum

145 rpm

Maximum

Engine Power	6.5 hp
Working Diameter	1000 mm
Vane Dimensions	350 x 150 mm

Performance Features

Key Features

- Gasoline-powered efficiency
- Adjustable working speed
- Rotating safety cage enclosure
- Precision-engineered leveling output
