

Concrete Pump End Hose, 30000 CBM Capacity

This end hose is designed for truck-mounted concrete pumps, with a capacity of 30000 CBM for C25 or C30 concrete. It is engineered for durability, ensuring efficient concrete delivery.

Product Overview

High-Performance Concrete Pump End Hose

This durable end hose is specifically engineered for truck-mounted concrete pumps, designed to withstand the rigorous demands of construction sites. With a robust capacity of 30,000 CBM, it ensures reliable and efficient concrete delivery for large-scale projects. It is compatible with C25 and C30 concrete specifications, making it a versatile choice for professional concrete pumping operations.
