

# Concrete Pump Truck

This concrete pump truck offers remote, cable, and local control modes and includes an emergency stop for enhanced safety. Its comprehensive error monitoring system provides alerts to a wireless remote for real-time monitoring, and GPS monitoring enables remote data and position tracking.

## Overview

### High-Performance Concrete Pumping Solution

This heavy-duty concrete pump truck is engineered for high-volume concrete placement in demanding construction projects. It features a versatile multi-section boom system that provides extended reach and superior maneuverability on site. Equipped with a powerful hydraulic system, it ensures efficient pumping performance and precise operational control for large-scale pouring operations.

## Performance Metrics

### Maximum Pumping Capacity

**160 m<sup>3</sup>/h**

Rated Capacity

### Boom Length

51 m

## Technical Specifications

### Model Designation

HDL5191THB 2432E

### Concrete Cylinder Diameter

Standard Industrial

## Operational Features

### Key Features

Multi-section Boom, High-Pressure Hydraulic System, Site Mobility, Precision Control
