

Concrete Pump Truck Flap Elbow

High-manganese steel flap elbow designed for concrete pump trucks. It features integrated casting for enhanced durability in demanding concrete pumping applications.

Product Overview

High-Performance Concrete Pump Flap Elbow

This high-quality flap elbow is engineered for demanding concrete pumping applications, featuring robust manganese steel construction for exceptional durability. With an integrated casting design and a specialized 20-25mm thickness at wear positions, it is built to withstand high-pressure environments. This component helps extend service life and reduce maintenance costs for truck-mounted concrete pump systems.

Technical Specifications

Material	High Manganese Steel (Mn13Cr2)
Wear Position Thickness	25 mm
Manufacturing	Integrated Casting

Compatibility

Compatible Pump Brands	Putzmeister, Junjin, KCP, Cifa, Sermac, Kyokuto, Sany
------------------------	---

Features

Key Benefits

- Extended service life
- Reduced operational costs
- High-pressure resistance
- Optimal flow design
