

Concrete Reinforcement Mesh Cutter

This heavy-duty cutter is designed for efficiently cutting reinforced concrete mesh. It features high-leverage handles and hardened steel blades for clean cuts.

Product Overview

Heavy-Duty Concrete Mesh Cutter

This high-performance concrete reinforcement mesh cutter is engineered for demanding construction and demolition environments. It features a heavy-duty design with high-leverage handles to maximize cutting power with minimal user effort. Equipped with hardened steel blades, it ensures clean, precise cuts through reinforcement materials, while ergonomic grips provide comfort during extended use.

Technical Specifications

Blade Material	Hardened Steel
Design Features	High-leverage handles, Ergonomic grips, Heavy-duty construction

Applications

Primary Applications

- Construction site reinforcement cutting
- Demolition projects
- Concrete mesh processing
