

# Concrete Surface Scraper

This robust manual concrete scraper is designed for leveling and smoothing surfaces. It features a wide, flat blade with upturned edges to contain material and prevent spills.

## ADDITIONAL IMAGES

## Product Overview

### Professional Concrete Surface Scraper

The Concrete Surface Scraper is a robust, manual tool engineered for precise leveling and smoothing of concrete surfaces. Constructed from high-durability metal, it is built to withstand the demanding conditions of construction environments, from floor preparation to sidewalk finishing. The design features a wide, flat blade with upturned edges to ensure efficient material containment and distribution, providing professional results.

## Technical Specifications

Material	Durable metal construction
Key Applications	Concrete Leveling, Surface Smoothing, Debris Removal, Coating Application

## Design Features

### Blade Design

- Wide, flat blade profile
- Upturned edges for material containment
- Engineered for efficient coverage

Handle Compatibility	Central, cylindrical handle mount for enhanced leverage
