

Concrete Vibrator

This concrete vibrator is engineered for effective consolidation of concrete in construction projects. It features models with different power options and vibration frequencies to suit various applications.

Overview

High-Performance Concrete Vibrators

These professional-grade concrete vibrators are engineered for efficiency and reliability in construction applications. Available in multiple configurations including the ZN50FG, ZN70FG, ZN50FD, and ZN70FD models, these units offer versatile power options to suit various site requirements. With robust power outputs ranging from 1.1KW to 1.5KW and consistent high-speed operation, they ensure optimal concrete consolidation for high-quality results.

Technical Specifications

Performance Metrics

2850 rpm

Speed (50Hz)

3450 rpm

Speed (60Hz)

Model Comparison

Model	Power	Weight	Dimensions
ZN50FG	1.1KW (1.5HP)	16	425x250x277mm
ZN70FG	1.5KW (2.0HP)	17	425x250x277mm
ZN50FD	1.1KW (1.5HP)	14	380x230x200mm
ZN70FD	1.5KW (2.0HP)	15	380x230x200mm

Power Source Compatibility

1ph 60/50Hz, 1/3ph 60/50Hz
