

# Concrete Window Screw with T30/T25 Drive

This concrete window screw is designed for secure fastening in concrete, brick, and masonry. It features a specialized thread pattern for optimal grip and holding power and is available with a T30 or T25 drive recess for easy installation.

## Product Overview

### Professional Concrete Fastening Solution

This high-performance concrete window screw is engineered for secure fastening in concrete, brick, and masonry substrates. Featuring a specialized thread pattern designed for optimal grip and holding power, it ensures reliable installation for window and door frames. The screw is built for longevity with a corrosion-resistant coating, making it suitable for demanding construction environments.

## Technical Specifications

### Primary Applications

- Window frame installation
- Door frame installation
- Concrete fastening
- Brick and masonry anchoring

### Durability Features

Corrosion-resistant coating • High-performance thread design

### Drive Recess Options

T30, T25
