

Condensing Wall-Mounted Gas Boiler for Hot Water

This condensing boiler provides efficient heating with low emissions. It features a digital display, touch controls, and optional remote WiFi control.

Product Overview

High-Efficiency Condensing Boiler

This wall-mounted gas boiler is designed for reliable and efficient domestic heating and hot water supply. Utilizing advanced condensing technology, it achieves heating efficiency up to 97% while supporting both natural gas (NG) and liquefied petroleum gas (LPG). With over 20 integrated safety protection measures, this unit offers a powerful and flexible heating solution for residential applications.

Technical Specifications

Heating Efficiency	97 %
Power Capacity Range	13kW to 99kW
Compatible Fuel Types	Natural Gas (NG), Liquefied Petroleum Gas (LPG)
Available Designs	10

Key Features

Safety Features

- Over 20 protection measures
- Reliable structural integrity
- Individual temperature control
- Environmentally friendly emissions

Performance Highlights

97 % Max Efficiency	13 kW Min Output	99 kW Max Output
-------------------------------	----------------------------	----------------------------

Operational Interface

Interface Capabilities

Digital Display • Temperature Monitoring • Pressure Monitoring • Intuitive Controls

Operating Pressure	8.8 bar
