Product Overview

High-Performance Cone Crusher Wear Parts

These bowl liners are engineered for demanding mining and aggregate processing applications, providing a precise fit for HP200 and LT200 series equipment. Manufactured using original technical standards and high-quality materials, they ensure optimal crushing efficiency and consistent material reduction. The robust construction is designed to withstand extreme abrasive forces and high-impact stresses, significantly reducing equipment downtime.

Technical Specifications

Compatible Equipment	HP200, LT200HP, LT200HPS
Material Composition	High Manganese Casting or High Chrome Alloy
High Chrome Alloy Range	15% to 26% High Alloys

Key Performance Metrics

Performance Highlights

20 Years

Manufacturing Experience

30000 Tons

Annual Production Capacity

12 Months

Defect Warranty Period

Production & Quality

Manufacturing Workflow

- Moulding
- Pouring
- Heat Treatment
- Machining Inspection
- Non-Destructive Testing
- Final Delivery

Quality Standards

ISO Certified • CE • Quality Management System
