

Connecting Linkage Rod with Threaded Ends

This metal component is a connecting linkage rod. It features threaded cylindrical ends along with two central mounting holes.

Product Overview

Professional Connecting Linkage Rod

This black metal connecting linkage rod is engineered for precision mechanical and automotive applications. It features robust threaded ends designed for secure attachment, along with dual central mounting holes to facilitate stable installation. Its textured finish provides increased durability and surface resistance, making it a reliable component for heavy-duty mechanical assemblies.

Technical Specifications

Surface Finish	Textured black metal
Mounting Type	Dual central mounting holes
Connection Type	Threaded cylindrical ends
Key Features	Threaded ends, Dual mounting, Mechanical linkage
