

# Connecting Rod Assembly for Internal Combustion Engines

This connecting rod assembly is designed for use in internal combustion engines. It includes the connecting rod, needle roller bearings, thrust washers, and piston pin.

## Product Overview

### High-Performance Connecting Rod Assembly

This precision-engineered connecting rod assembly is specifically designed for reliable performance in internal combustion engines. Crafted from high-strength steel alloy, the assembly features precision-machined surfaces and hardened components to withstand high loads and speeds. It includes essential components such as needle roller bearings, thrust washers, and a piston pin, making it an ideal solution for small engine applications in motorcycles, scooters, and power equipment.

## Technical Specifications

### Included Components

- Connecting rod
- Needle roller bearings
- Thrust washers
- Piston pin

### Material

High-strength steel alloy

### Compatible Applications

Motorcycles, Scooters, Power Equipment, Small Engines

## Quality & Construction

### Surface Finish

Precision-machined • Hardened and ground pin

### Performance Features

- High load capacity
- High-speed reliability
- Optimal axial alignment
- Tight tolerance fit
